

Sportcamp Raudaschl

Lake Wolfgangsee · Ried am Wolfgangsee · Sailing · Windsurfing · Wing foiling · Water skiing · Wakeboard, wakefoil and wakesurf

THE FIVE SENTENCES FOR THIS LAKE

- 1 The yellow buoys mark a launch and landing lane. Boats leave fast there. Stay out of it.**
Rule 3 · Know the Rules & Zones
- 2 Don't rely on the storm warning light. Look at the sky yourself. When wind comes, be back at the shore within fifteen minutes.**
Rule 1 · Check Weather and Surroundings
- 3 Wing foil beginners: wetsuit, vest, helmet, both leashes. And when it tips, fall with the board.**
Rule 7 · Always Proper Equipment
- 4 Divers surface at the Gamsjäger. Keep well off the shore there. A dive boat is not a turning mark.**
Rule 8 · Keep Your Distance – Protect Swimmers, Divers, and Others
- 5 Before you head out, turn around once and remember where the slipway is. Anyone can get out there.**
Rule 5 · Secure Entry & Exit Points

WHERE THIS COMES FROM

From the conversation with **Josi Schenner**,
Sportcamp Raudaschl, Ried at Lake
Wolfgangsee, on 2026-08-16. Interview by
Dieter Heinz, Safer Shorelines Ambassador.

„Find out what applies on the lake before you
go out. And have a healthy respect for the
water.“ – Josi Schenner, Sportcamp
Raudaschl

Experience of the centre, not official
regulations. Complete with all 71 tips in six
languages at safershorelines.com. Liability

Lake Wolfgangsee • Sportcamp Raudaschl

1 Check Weather and Surroundings

Safety: „Your day on the water starts with a quick look up: check the weather, wind, and waves - and you set off prepared, relaxed, and knowing your spot.“

AT LAKE WOLFGANGSEE **EXPERIENCE** (to be confirmed)

The storm warning light on Lake Wolfgangsee often comes late or not at all. So we look ourselves: sky, wind, the Schafberg. When a cold front is forecast we stop renting out SUPs and bring everyone in by motorboat fifteen minutes before the wind arrives.

2 Always with a Buddy or Supervision

Safety: „Water sports are best enjoyed together - with someone by your side who looks out for you and shares the experience.“

AT LAKE WOLFGANGSEE **HOUSE RULE**

In a course there are at most four people per instructor, and the instructor is always alongside in the inflatable. Rentals come with the rescue service: if you drift off, we bring you back.

3 Know the Rules & Zones

Safety: „Know the rules of your spot and you move like a local: zones, buoys, and flags show you where your sport works best.“

AT LAKE WOLFGANGSEE **HOUSE RULE** (to be confirmed)

The yellow buoys are launch and landing lanes. Boats leave and return fast there, don't cross them. In the camp, swimming is not allowed at the front left where sailing boats moor, nor in the motorboat entrance. Within the 200-metre shore zone motorboats only move to moor and cast off.

4 Watch for Others

Safety: „A quick glance at the people around you makes you a guardian angel: those who look early can help before help is even needed.“

AT LAKE WOLFGANGSEE **EXPERIENCE**

For a wing foil rescue we approach upwind at idle and call out first. The person first, then the gear. And: a swimmer without a buoy is invisible to a ship, even three metres away.

5 Secure Entry & Exit Points

Safety: „Sort out your entry and exit before you start - you'll get in relaxed and always know how to get back ashore with ease.“

AT LAKE WOLFGANGSEE **EXPERIENCE**

No entry or exit point here is regulated by the authorities. The slipway is the safe exit, anyone can get out there. The swimming ladder is the weak spot, anyone exhausted struggles to climb it.

6 Education & Limits

Safety: „Every bit of training makes your playground bigger: the more you learn, the more you can trust yourself - and truly enjoy your skills.“

AT LAKE WOLFGANGSEE **HOUSE RULE**

Wing foiling looks far easier than it is. Before every course we ask about swimming ability, weak swimmers wear a vest. The lake gets deep quickly close to shore, don't underestimate it.

7 Always Proper Equipment

Safety: „Good gear feels good: it keeps you warm, makes you visible, and lets you enjoy what you love without a worry.“

AT LAKE WOLFGANGSEE **HOUSE RULE**

A safety system is mandatory, which one depends on the sport. Wing foil beginners: wetsuit, vest, helmet, board and wing leash. In the windsurf course the instructor's boat provides the safety cover, because a vest can become dangerous under the sail. On a SUP on the lake: a swim buoy instead of a leash if you're not a confident swimmer.

8 Keep Your Distance – Protect Swimmers, Divers, and Others

Safety: „Keeping a good distance gives everyone in the water room to breathe - swimmers, divers, and you. That is the mark of a true waterman.“

AT LAKE WOLFGANGSEE **EXPERIENCE** (to be confirmed)

Divers enter and exit at the Gamsjäger. As a kiter or winger keep well off the shore there. A dive boat is not a turning mark. Keep at least 50 metres from ferries and dive flags.

9 Adjust Your Speed & Remain Absolutely Sober

Safety: „Slow and clear-headed near the shore - that keeps the day beautiful for everyone on and in the water.“

AT LAKE WOLFGANGSEE **LAW** (to be confirmed)

Near the shore we ease off the throttle. 10 km/h applies in the 200-metre zone, 15 km/h in the narrows. From 1 July to 31 August combustion engines rest on the lake.

10 Enjoy & Protect Nature

Safety: „Clear water and living shorelines are your playground: enjoy nature and leave it as beautiful as you found it.“

AT LAKE WOLFGANGSEE **LAW** (to be confirmed)

Lake Wolfgangsee is of drinking water quality. Reed belts and nature reserves stay untouched, nothing goes into the lake, everything comes back with you.
